## MacOS: Sorry this adobe app is not available

**Major issue**

I've tried so many cr@ck fixes for Adobe 2025 versions none of them are working like Lulu, Gasmask, Host file method, or Terminal Host file replacement but not working. Then I did some research about Adobe, I found all 5 layer protections that Adobe has meanwhile, it seems below the 2024 version the host file method will work which I haven't tried yet but Theoretical is possible I'll try and let you know people soon also the meantime if anyone got this fix for Adobe 2025 please let me know.

I've attached some useful YouTube links & website links for the Adobe Host file fix

<https://github.com/ethanaicode/Adobe-Block-Hosts-List/blob/main/hosts>
