<https://preview.redd.it/any-march-2025-hosts-file-v0-mgc0iigzusqe1.png> I absolutely hate it when this happens. It basically is when Adobe shuts down the mod because it's not genuine, just in Filipino. Help me out!

Would I still be able to use AdobeZii if I currently have a student account?

I have a license for certain Adobe CC software due to being a student. Would using AdobeZii affect my license (or vice versa)? I use a 2017 MacBook Pro, Ventura 13.6.9

How to install from apptorrent

I've been trying to pirate adobe for a bit now and have tried getting the apps from monster group on apptorrent. However for some reason I can't click on the links that take me to download; they keep opening a new page that doesn't seem related to anything.
