## An Updated Guide for Adobe Zii in 2024

**Solved**

I have parsed through this subreddit for a bit and this is how I installed the adobe 2021 version of the creative cloud on my pc. A couple requirements for my method were:

1. I needed to be able to install without root privileges or be in an isolated environment when root is required. I think its fair to say that the TNT group is a reputable source, but its always better to be safe. I have used their software before and never had issues. The risk comes from the distributor as most of these hacks are posted on private forums.
2. The actual software needs to come from adobe. This eliminates the risk of malware being injected by a third party.
3. I'd like to run the latest version of Adobe CC in case I get access to a legitimate copy of a program.

Why not just download the latest versions (2024) of adobe on cmacked or torrentmac?

I skipped the VM step.

1. Downloaded Adobe Zii: <https://appnee.com/adobe-zii/>

I downloaded v6.1.7 and moved it to my Applications folder.

2. I downloaded Adobe CC:

[https://ccmdl.adobe.com/AdobeProducts/KCCC/CCD/5\\_7\\_0/osx10/ACCCx5\\_7\\_0\\_1307.dmg](https://ccmdl.adobe.com/AdobeProducts/KCCC/CCD/5_7_0/osx10/ACCCx5_7_0_1307.dmg) -- I unchecked the "Adobe Genuine Software" verification. After installing, I opened CC, went to my settings/preferences and unchecked the "keep Adobe CC up to date" option.

3. Used the `adobe-packager` : <https://github.com/Drovosek01/adobe-packager>

```
$ cd ~/Documents
```

```
$ git clone https://github.com/Drovosek01/adobe-packager
```

```
$ cd adobe-packager/
```

```
$ ./ccd1.command
```

I entered `v4` for the URL version when prompted.

I downloaded After Effects, Illustrator, InDesign, Lightroom Classic, and Premiere Pro. When it asks for which version, I picked whatever was supported according to this list in the description: <https://appnee.com/adobe-zii/>

In my Downloads folder, I ran each of the installers. (Troubleshooting: Before I installed CC, running the installers gave me error codes. They installed successfully after I running the CC installer in Step 2.)

4. In Adobe Zii, I clicked "PATCH OR DRAG" and waited for it to complete.

The applications are in my Applications folder, some programs work (open and save files just fine), others might crash on opening. Illustrator 25.4.1 and InDesign 16.3.1 work for me, the other applications I had issues with when opening and didn't continue trying different versions.

Where to uncheck the "Adobe Genuine Software" verificatio? I Didn't get that option... And now I always end up with a popup "start your free trial of photoshop"... Any way to solve this?

I did everything like the comment said, but somehow, when im installing this keep appearing "Error: SyntaxError: JSON Parse error: Unexpected EOF (-2700)"

Someone can help? How can I do this right?

Adobe Zii only works for 2022 apps, so you're stuck to a 2 years old technology
