Torrents for Macbook?

Question

I never used a mac, ever. I've always been a windows PC user. Now I want to buy my first macbook laptop.

I'd like to know if it's as easy to find and install pirated software on a Mac as it is on a PC?

Is it just downloading the torrent and installing the software or are there any more steps on the Mac? Are torrents easy to find?

Update: I just found out how important a vpn is when doing stuff like this.

They are easy to install, you just drag the App to Application folder and use them

I use:

<https://www.torrentmac.net/>

<https://macoshome.com/>

also check <https://github.com/iCHAIT/awesome-macOS#readme> for mac apps names based on what you need it for

My MacBook is an Intel MacBook Pro, it may be a bit more difficult to find apps for apple silicon macbooks at present but that will change over time

Torrent Client I used was Transmission <https://transmissionbt.com/download/>

Site I used mostly was <https://www.torrentmac.net/>

The install process is pretty straightforward, instructions and such it's just drag and drop very rarely a keygen is used.
