GUI from command prompt?

Hello, I'm testing Unraid this week. I really like to boot to the Unraid GUI on my Unraid server.

When I boot up, I can choose to boot to the GUI and that is great. But there are occasions when it crashed and reboots on it's own and I walk into my office to only see the command prompt. Is there a command to start Unraid's GUI?

Also, is there an option to boot only to the GUI?

Thanks in advance. This community is so very helpful.
