Frigate 0.14 slow at replay videos

Am I the only one who thinks frigate has become slow to play recorded videos? From when I click on a recorded video until it plays, a long time passes compared to before the update. Frigate runs as addon in Home Assistant on a Lenovo tiny m93 with 16gb ram and plenty of processors. There is also a Google coral usb connected.

I am running [0.15.0 Beta 3](#) right now and performance has improved for internal network playback.

Yesterday I was unable to play a clip back at all externally. Today 7-10 seconds mostly. I don't want to lay this on Frigate just yet since I have Cloudflare and an ISP to rule out. I am using HA ingress also, so I really should bypass that. I should be more methodical but elimination is easier until I understand more of the data paths and protocols between storage and screen.

Noting that the Frigate team has bumped ffmpeg to version 7.

r/SilverAgeMinecraft • 3 mo. ago

I go to 1.6.4 and share my world screenshots, also like 1.6.4 more than 1.8.9.
