Slow to load timeline

- Frigate version 0.14 Beta 3 running in Docker.
- Dell PowerEdge T130 running Xeon E3-1200 v5 @ 3.00Ghz, 8GB RAM.
- Ubuntu 22.04 with only a few other containers for Home Assistant.
- TPU Coral USB
- CPU usage is around 25% according to Frigate

Fully understand this is a beta, so either take this as feedback or point out if this isn't normal please.

I find certain elements of the UI are just slow to load. For example when I click on a camera, the live stream loads quickly. But when I then select 'History' it takes a good 5-8 seconds for the timeline bar to load at the right. Does anyone else have this issue?

I think there was a PR after 0.14beta3 that significantly improved timeline loading for me.

 Top 1% Commenter

you should check the network tab of browser dev tools and see what part is taking a while to load. There are no known issues with slow loading
