Android compatible USB-C to Ethernet

Hello all,

First off, if this question is answered in another thread I overlooked, please post it below.

Looking for recommendations of a unmanaged plug-n-play USB-C to Ethernet Adapter that works with Android Devices. Will use with old LG V20 (HiFi DAC), and newest Samsung devices.

Thank you

Not entirely sure if you want to get ethernet connection to your phone or from it... but I do have a USB c to ethernet adapter to get more stable speeds to my phone and it works great out of the box with no need for more than plugging it in.

Here's where I got one: Anker USB Type-C to Ethernet... https://www.amazon.co.uk/dp/B010086WNA?ref=ppx_pop_mob_ap_share

As another mentioned,

I've also got an Anker USBC Ethernet adapter. It just works.

All my USB C devices are able to use it immediately upon insertion. Phone, tablets, computers, etc.

Try the Pluggable brand ones. I've bought and confirmed that the USBC-TE1000 works.

Is it possible to read a HDD on an android? I'm thinking HDD to USB-A to USB-C then to Phone. Is this feasible?
