I think it's actually the fastest solution. I was able to upload 800GB in a few hours so it's maybe your internet connection?

Actually 45486s is roughly 12h so that sounds relatively acceptable.

I have local server maybe because I have many files

Assets	Size	
35,640	929 GiB	<a href="#">⋮</a>
11,537	117 GiB	<a href="#">⋮</a>
2,285	399 GiB	<a href="#">⋮</a>
182,953	970 GiB	<a href="#">⋮</a>

Wait it out, just done pretty much the same with 900 gigs.

Then comes the fun of processing them...

Worth it, finding pics we had completely forgotten about thanks to the facial recognition and smart search.

External library, add the location in your docker compose and then scan it from Immich admin

have you checked external libraries? much easier, thats what i used instead of uploading everything.

 2   Reply  Share ... 1 more reply**lolwutdo** • 7mo ago

That's not even a lot of time? Just be patient. lmao
