## Constant "Private DNS server cannot be accessed" and internet drops

Been having this issue for a few days now. Here is how it goes:

1. I connect to Wifi with Private DNS set to off.
2. I change Private DNS to [dns.adguard-dns.com](https://dns.adguard-dns.com)
3. I get error "Private DNS server cannot be accessed".
4. Wifi is connected but no internet.
5. Sometimes, it connects, goes through and works for a few minutes. Then it just hangs and no internet. No DNS errors.
6. I disable Private DNS. Internet starts working again. I try to set Private DNS to Adguard and I start back at #3.
7. When I set to NextDNS, zero issues.

Device: S23U unlocked with OneUI6.1
