Copy and paste doesn't work in code-server. Is it familiar to anyone?

Support

I cannot paste in code server which is a huge blocker for me. I found a [github discussion](#) about the topic. They say that `editor.action.clipboardPasteAction` is not in the command paltte and this causes the problem. And yes, this command is missing from my command palette. Maybe they solved it maybe not. What should I do?

My code-server version.

```
code-server: v4.95.1
Code: 1.95.1

- I would first see if the issue was reintroduced somehow later than what's discussed there.
- And I would try another browser to see if that somehow fixes things.
- Then if that doesn't work, I'd look and see if you can revert to the last version that worked for you.
- If that doesn't work, look for another way to edit files.

Forgot to mention that the problem occurs in the HA app for mac.
