Bradman1171

How to properly configure AdGuardHome DNS-over-TLS via Opnsense plugin?

Question

Hey everyone, I'm new to opnsense and adguardhome and cant seem to find a good guide to enable DNS-over-TLS. Looking for help! Thanks in advance!

Use dns over tls in unbound and point adguard at unbound

[Reply](#)Bradman1171 **OP** • 2y ago

Does this mean Ill need to change the adguard port to 5353?

Do you want to use it as a DNS-over-TLS server in adguard, or use DNS-over-TLS for your upstream DNS connection?

Why use adguard instead of DNSBL? Quite curious about that

1 Reply ...

**Bradman1171** OP • 2y ago

DNSBL?

tbh, I didnt even know what DNSBL was till looking it up right now. Do you know of any online guides, id be willing to look into it

**Vilmalith** • 2y ago

Adguard is still much more detailed and easier to use and doesn't take a performance hit for the paranoid folks using lots of lists.

use unbound only for local resolving

Private reverse DNS servers=127.0.0.1:5353

Upstream

[//local/...mylocaldomainN/][127.0.0.1:5353](#)

tls://..... #external resolvers

Or use unbound as a resolver

Upstream

[127.0.0.1:5353](#)

but the latter is much slower for me.
