Headscale: Can't load DERP map

I've run headscale container on my unraid successful in the past. Today I need to reinstall it from the scratch.

However after spinning up the container, all I got is this error message:

I've run headscale container on my unraid successful in the past. Today I need to reinstall it from scratch.

```
ERR Could not load DERP map from path error="Get \"  
[ https://controlplane.tailscale.com/derpmap/default\" ]  
(https://controlplane.tailscale.com/derpmap/default) ": dial tcp: lookup controlplane.tailscale.com  
on 127.0.0.11:53 : read udp 127.0.0.1:45085-> 127.0.0.11:53 : i/o timeout" func=GetDERPMap  
url=https://controlplane.tailscale.com/derpmap/default
```

When I used nslookup command inside the container, it can find derp website:

Update: I also found I can't update all my dockers. I found the cause of the problem, but I still don't know why it just happens now. I has set my unraid DNS to 1.1.1.1, 8.8.8.8, 9.9.9.9 since I installed unraid. I have to remove 1.1.1.1 from my DNS list and everything is now working properly. I'm checking with my ISP whether they are now blocking dns 1.1.1.1.

What are some extensions / features, core or not, that you'd consider essentially a no brainer these days to reduce complexity?
