An Affordable IPv6 VPS

[Seeking Advice/Support](#)

I am looking for an affordable IPv6 VPS as I want to do ssh reverse tunnels to expose my web server. Can I get an IPv6 VPS for US \$5 per month ?

There are many types of IPV6 VPS - 1) IPV6 VPS with a NATed IPv4, 2) IPV6 without IPV4 connectivity, 3) IPV6 VPS with IPV4.

Which do you want? The pricing is different for each.

I currently have a Linode VM with an IPv6 address attached to it. I'm sure other providers do this, as well.

**Gloomy_Membership939** • 1y ago

Akamai, which runs Linode is very hard to sign up as they have anti-fraud mechanism that bans my IP address because I am in a country under U.S. sanctions. I am not able to sign up with Tor or a VPN as their anti-fraud mechanism detects the VPN IP.

**AutoModerator MOD** • 1y ago

The mods of [r/VPS](#) have set automod to respond automatically based on the initial flair a post had when posted.

It seems like you chose the **Seeking Advice/Support** flair when making this post.

This flair is for those stuck with a (mostly technical) issue that they're trying to find solutions to.

If you feel that another flair would be more fitting, feel free to change it on your own (that's possible). You can look for our post describing all post flair options in detail [here](#). Mods may also change post flair at if they feel it's necessary.

I am a bot, and this action was performed automatically. Please [contact the moderators of this subreddit](#) if you have any questions or concerns.
