Issues with AnimeTosho

Just started noticing my manual anime searches were failing with no results. Regular TV series were working fine.

Logs show:

```
19-11-5 17:13:09.3|Error|ReleaseModule|Episode search failed: Object reference not set to an instance of an object
```

```
[v3.0.3.653] System.NullReferenceException: Object reference not set to an instance of an object
```

```
at Sonarr.Api.V3.Indexers.ReleaseResourceMapper.ToResource  
(NzbDrone.Core.DecisionEngine.DownloadDecision model) [0x00039] in  
M:\BuildAgent\work\63739567f01dbcc2\src\Sonarr.Api.V3\Indexers\ReleaseResource.cs:84
```

Mine is set to `https://feed.animetosho.org` w/ `/api` for both Torrents and Usenet and tests fine. Does yours test fine?

So this has now started happening even with Tosho disabled. I am seeing a lot of rate limiting happening in processing results from my jackett instance...could this be causing my episode searches to fail? I am consistently getting "Unable to load results for this episode search. Try again later".

EDIT: After eliminating several jackett indexers it looks like the searches are completing quick enough now for sonarr to actually return results. Apparently all of my "backup" indexers were causing obscene amounts of results to be returned.

Before I was still seeing sonarr chewing through results being rate limited and returned from jackett after the UI had already displayed the aforementioned error message. Now it actually completes episode processing.

EDIT2: Yeah so it seems like the latest v3 version is struggling to process all the returned results. I have about 9-10 indexers that support anime, and until recently I could have them all enabled for manual searching. Now if I have more than 4 indexers supporting Anime enabled it seems to choke and not return manual results.

I moved the newznab side of Tosho under hydra to eliminate it from sonarr and let hydra do some deduplication. I'm having trouble getting most of my torznab indexers to work in hydra though for further consolidation. I would prefer to keep them in sonarr if possible.

This appears to have been fixed in v3.0.3.654, my searches no longer fail failed to process results.

EDIT: Spoke to soon, still having random failures...

I'm still having issues with this, it now occassionally happens with none Anime shows as well. Trying to search for hell on wheels Season 2 and just keep getting

"Unable to load results for this episode search. Try again later ".

I've continued to attempt to reduce my # of indexers (i'm down to only 5 enabled) and it has helped but I still get random failures.
