You have to trust the client or you wouldn't be attempting to login. Using your logic, why do you trust chrome?
I assume you trust the mobile apps on your phone that you're also logging into?

This is why you should use MFA.

 3  ...**Majestic_Race_8513** • 1y ago

It's questions like these that make me think we're doing a better job making technology safe than most people would have you believe. Someone like my mom should be getting hacked by things like this daily
