Salatgurke-

Provider not Found

I want to add proxmox to my freshly installed authentik instance.
I have created a provider and an application named "proxmox-main"

I have also created a new realm in Proxmox and added the client secrets as well as the issuer url. Problem is, that if I click the login, I just get an error:

Maybe you see in promox no request and then you can point the error to the provider configuration in Authentik

Did you follow any specific tutorial or Web?

Where are the authentik logs? I only can see "events"

I also cannot see anything in my proxmox logs.

I followed the official docs for installation and setup.
