Oauth login doesn't work anymore.

Since my update to 1.113 I cannot login anymore.

EDIT: forgot to mention that I DID make the change to the Redirect URI as per changelog instructions.

I'm using this nextcloud app <https://apps.nextcloud.com/apps/oidc> to provide the openid login for my immich instance.

Since the 1.113 update I cannot login anymore. Everything is behing traefik and looking at the logs I have:

Traefik:

all fine except:

```
"POST /apps/oidc/token HTTP/1.1" 401 30 "-" "-" 745 "nextcloud@file"
```

Did you read the changelog?

The GitHub releases have descriptions, and Immich upgrade descriptions are very detailed. Please read them to note breaking changes. 1.113 changes how OAuth redirect links work for mobile.

Immich does not do semver releases right now (meaning upgrading B / C in version A.B.C is not safe to do automatically).

For that matter, I recommend actually looking at the upgrade description in question before nuking any data (or coming to Reddit) if something breaks from an update.

I did make the change to the Redirect URI, forgot to mention it in the post. I obviously have a backup to restore if I manage to fix the problem.

fwiw, I started using OAuth with 1.113 :), but to get it working, I had to change the issuer URL to "api/v1/oauth/.well-known/oauth-authorization-server/". add your fqdn to the beginning, or whatever your well-known path is for your OAuth server...once I did this, works like a champ....was getting a similar error that you were getting until I changed to the well-known, instead of the specific auth url..

**twiceddit** [OP](#) • 8mo ago

my issuer URL already looks like this: "https://nextcloudserveraddress/index.php/.well-known/openid-configuration".

I'm honestly starting to think it's a bug in either the nextcloud app or immich, but I don't really know how to understand which one it is.

So, I downgraded to 1.112 and it still doesn't work. I didn't change anything in the provider configuration (only the mobile redirect URI) but it seems that Immich isn't the problem.

I'm really not looking forward to spinup another provider but I guess that's the only way forward now.

Thanks everybody!
