Issues setting up OAuth

Hello!

I'm working on setting up an Immich instance for a school club, and I am using Keycloak as an identity provider.

However, I am getting an error message that a few hours of google-ing and troubleshooting haven't been able to solve.

```
immich_server | [Nest] 16 - 12/12/2024, 6:32:09 AM VERBOSE [Api:LoggingInterceptor~nn85ae  
immich_server | [Nest] 16 - 12/12/2024, 6:32:09 AM DEBUG [Api:LoggingInterceptor~n3bne  
immich_server | [Nest] 16 - 12/12/2024, 6:32:09 AM DEBUG [Api:LoggingInterceptor~4jhv3p  
immich_server | [Nest] 16 - 12/12/2024, 6:32:09 AM ERROR [Api:ErrorInterceptor~iigajxgc  
immich_server | OPErro: expected 200 OK, got: 301 Moved Permanently
```

I have Immich + Keycloak running on my homelab, but I've never faced something similar. I've tried reproducing your issue by tweaking my parameters, but no success here. :/

Could you provide the `Location` response header of the `auth/login` request? I guess this will help me to debug it further.

Also, if it helps, I can provide you the parameters I used to have my setup running. :)

  1   Reply ...**trihardstudios** OP • 4mo ago

On the front end the only `auth/login` request is returning a 200.

I think its an error with however the immich itself is calling the server.

Im going to try to get wireshark setup so I can take a look at which requests are giving that error.

I can't even find the oauth settings page, with

  1   Reply ...**trihardstudios** OP • 4mo ago

It's under the server admin page when you are signed in as admin.
