A web interface for rustdesk?

G'day, I've just setup my own rustdesk server and am wondering if anyone knows of a web interface. The official web console looks like it is removed until they add it to the premium version.

I'm looking for a free one I can run so I can quickly log into my PC from any computer without installing the windows apps.

From what I saw they removed it while they decide if they will have it as a pro only feature. That's all I've found

Do you have any good suggestions for a replacement. I had a look at meshcentral but it didn't want to work for my device? Can't remember the error.

You could look into [Apache Guacamole](#).

I managed to build rustdesk-web, though i don't like how it looks rn so my setup is, meshcentral webui for work/public devices, rustdesk clients for personal.
