Rustdesk behind Nginx Proxy Manager

Self Help

I have been trying to configure Rustdesk behind NPM and I haven't had any luck. Does anyone know how to use reverse proxy for this purpose. My other subdomain works fine such as jellyfin, joplin and all.

I tried port forwarding eventhough I have a reverse proxy - didn't make sense but still tried I tried UFW in linux VM and tried forwarding to rustdesk docker container

Thanks in advance.

I don't use a web frontend for RustDesk but I do run the self hosted server. I just used port forwarding on my router to forward to my rustdesk server IP address

I'm assuming you would have NPM proxy the web GUI port but if Rustdesk uses another port to connect to clients then that port will need to be forwarded through your firewall I believe.
