Basic Auth for Arr Services with Authentik

I could not for the life of me get Sonarr to auto login using basic auth with Authentik, (using Swag with forward auth). Turns out after so many hours debugging it I realized I had named the http basic username key 'sonarr_username' instead of 'sonarr_user' (for both Group and Proxy) and because of that my email was being used as the username when attempting to login. When using 'sonarr_user' on both the Group and Proxy, the proper username was being picked up. But for other 'arr' services using '**arr_user' doesn't work but '**arr_username' works.

I tried looking into the source code as to why for Sonarr it specifically needs to use 'sonarr_user' but I could not find it anywhere. I've currently just accepted that it works but I would feel much better about it to get the why it works, if anyone knows

*Using the linuxserver docker image for Sonarr using branch main

Hi [u/Crasher456](#) -

There are many resources available to help you troubleshoot and help the community help you. Please review this comment and you can likely have your problem solved without needing to wait for a human.

Most troubleshooting questions require debug or trace logs. In all instances where you are providing logs please ensure you followed [the Gathering Logs wiki article](#) to ensure your logs are what are needed for troubleshooting.

Logs should be provided via the methods prescribed in the wiki article. Note that **Info** logs are rarely helpful for troubleshooting.

Dozens of common questions & issues and their answers can be found on our [FAQ](#).

Please review our troubleshooting guides that lead you through how to troubleshoot and note various common problems.

- [Searches, Indexers, and Trackers - For if something cannot be found](#)
- [Downloading & Importing - For when download clients have issues or files cannot be imported](#)

If you're still stuck you'll have useful debug or trace logs and screenshots to share with the humans who will arrive soon. Those humans will likely ask you for the exact same thing this comment is asking..

Once your question/problem is solved, please comment anywhere in the thread saying 'solved' to change the flair to **solved**.

I am a bot, and this action was performed automatically. Please [contact the moderators of this subreddit](#) if you have any questions or concerns.
