DrXapatin

Shortcuts is not allowed to send keystrokes.

[Help \(Mac\)](#)

I just updated my Mac to Sonoma and now I can't use shortcuts where Applescript uses keystrokes. I get the error Shortcuts is not allowed to send keystrokes.

Before was working fine and now not.

I already added to the Accessibility under Privacy settings. I have shortcuts and shortcuts event in there. I already removed, added again, toggled on and off and nothing.

Sometimes it works back but after a while I get the same message again.

Any thoughts? Thx

Adding Shortcuts and the app that the keyboard shortcuts run on in Accessibility works for me:

In MacOS 15 Sequoia, I also had to add /System/Library/CoreServices/ShortcutsActions.app

Are you running it from the menu bar? If so you have to add control center to accessibility

Have you tried Run Script over SSH?
