Reply

[deleted] • 10mo ago

I also recommend. Coming from pc where I used AHK, this was able to fill that void.

If your work Mac is enrolled in a mdm your it group can see every app you have installed, they may be required to report unapproved apps to management, so you better have a story ready when they ask what it's for.

I use keyboard maestro to make them. It can also recognise on screen buttons and press them.
