Alternatives to Rufus that are on mac?

Help Needed!

I use a mac and I'm trying to format my 64gb MicroSD card to FAT32 for OnionOS, but the only thing I've heard of that people use is rufus, and that isn't available on mac. Are there any alternatives that do the same thing?

You can do it with the built in Mac disk utility tool.

MS DOS should work

This ^

I have done this multiple times without issue. 👍

Can I make a copy of the micro SD card onto another card (that's legit)?

For Linux based ISO, try Etcher. For Windows 11/10/7 ISO, try WonderISO. Both of them work on Apple Silicon Mac.

Apple deliberately make all 10 nice alternative4s useless. They dont want us to do it. Use rufus on windows to make a bootable usb installer for Kali or your chosen distro, and then plug the drive into thr mac as a fat 32 disk, start mac, set that disk to primary boot or use prtsc options button during restart, and choose linux installer BOOM! FU Tim Cook! Herre is a way; <https://github.com/schmurtzm/Onion-Desktop-Tools/>
