Failed to join cluster, now I can't even log in web gui

[Question](#)

Hey there,

Let me preface this by saying that I'm very new to Proxmox. I have been playing around with it for a week or two or so.

Anyways, here's the situation. I have a Server1, I Proxmox server that I'm using to educate myself. Now I wanted to add a second server, let's call it Server2. I was planning on virtualizing UnRaid, and Proxmox Backup Server (purely to backup server 1). I created a cluster on Server1, setup the UnRaid VM on Server2, but then when I tried to join, I got the following error: "permission denied - invalid PVE ticket (401)." And I couldn't access the web GUI on Server2 either. (On a side-note, the VM's wouldn't start anymore on Server1, since something was wrong with the cluster. Server2 was still somehow added to its knowledge, but since it wasn't there, it went like "nope!" But just deleting Server2 node fixed that). I did a quick fresh install of Proxmox on Server2, and I tried joining the cluster again, but I'm getting same error, and again, I can't access the interface. I went and tried some stuff that I

Any downside to a 2 node cluster, and do they need to be the exact same version?

Everything is working fine - but the web UI has question marks on every LXC, VM and Storage device. No errors in tasks. What do I do?
