Ding-Dong-Ring-Wrong

Pirating adobe products

Question

Has adobe made it much more difficult to pirate their products? My college forces me to buy adobe dreamweaver for \$20 per month and the pirated versions from what I've heard are much harder to get

Remember: Pirating Adobe products is always morally correct.

One of the few products where giving them money would make me feel *more* guilty.

Especially when they charge you for ending your subscription.

What kind of honest well intending person would do that?

I made the mistake of ~~buying~~ renting photoshop because it was right when they released native support for apple silicone and holy fuck I hate Adobe. I found out it was "only" \$10 a month instead of the normal \$20 because its a yearly contract and if you cancel early, you get charged half of your remaining months.

You could either use [monkrus.ws](#) or look at the guide on the [GenP Subreddit](#)

some cracker out of a leap of faith. You download everything from Adobe themselves and then patch it.

On the same reddit you can find the "Monkrus Guide" which basically gives you a pretty unnecessary explanation on how to directly download the cracked adobe apps from monkrus.ws Monkrus is a trusted pirate of the high seas who has basically the best adobe cracks you can find, if you don't want to use GenP (in my opinion GenP is far superior but you do you).

If you are on mac, check out [r/AdobeZii](#). The subreddit itself was originally made for the AdobeZii patcher, created by the TNT cracks group. However, this method is basically dead and now all the posts and guides on there follow the cmacked method, where you download the apps and patchers from cmacked. Cmacked isn't quite as good as Monkrus for Windows, but as far as I know, for Mac it's your best bet and it totally works, I've tried it.

If you are indeed on Mac and need some help with this method, I can definitely link some guides I posted because the AdobeZii subreddit is not as beginner-friendly as the GenP one.

Good luck, and remember, pirating Adobe apps is the most ethical thing you can do.
