Cheapest country as of now to get Adobe CC?

Discussion

Adobe has trippled their prices in Egypt, Turkey, Argentina and Brazil. I use often the new AI features so I need to be connected to their services so pirating is not an option(as of my knowledge). What is the cheapest way to get the CC package? Yesterday they told me that I need to pay 420€, negotiated it to 230€, but its still double what I paid previously. I don't use most of the programs on the plan, but ocasionaly I do use Illustrator, PR, Acrobat

just pirate. your artwork wont be stolen, but neither will you get the "all new ai tools" that are pretty cool, but you will barely ever use them. like you never open compass on your phone

Pirato or piratina or freestuffia have very cheap prices

What are those? I will check them asap, but are they reputable, anything I should know?

Bypassing geopricing is not sustainable. All companies will suspend so called foreign subscription quicker and quicker, Youtube is leading the way, all will follow. In the same time, VPN+credit cards combo are also banned quicker and quicker. After being suspended few times, guess what you will do ? Go back paying the full price.

Pirate and you are done with it once and for all.

Now, I guess their AI features are not piratable since they are likely server based. Then don't rely on them. Otherwise you will be trapped in their ecosystem, and as I said, you will eventually pay the full price.

Can you get their AI features somewhere else? Like using stable diffusion, flux, davinci resolve...

It's exactly the same price in every country.

Paying for Adobe products is unethical, just get an older edition via friendly means and skip the hassle of having your data stolen and the copyright rights to your first born child signed away
