AMD Single GPU Passthrough. A journey with success!

Wanted to share this incase it helps even a single person.

Was having the hardest time getting unRAid GPU passthrough until I came upon this post:

https://www.reddit.com/r/unRAID/comments/q2lbb6/gpu_passthrough_last_steps/

Setup:

- MB: Gigabyte Technology Co., Ltd. X570 GAMING X
- CPU: AMD Ryzen 5 3600 6-Core
- GPU: AMD 5600RX
- HHD: 10TB WD Red x5
- SSD: Samsung 980 x2

You're typically meant to "Bind Selected VFIO" so that Unraid doesn't initiate the GPU (i.e. load its drivers). If Unraid did initialise the GPU, you wouldn't be able to use it in a VM.

Coole Anleitung, vielen Dank schonmal dafür. Aktuell verwende ich Hyper-V, um mittels Easy-GPU-P insgesamt drei VM gleichzeitig aufrecht zu erhalten. So können drei Leute gleichzeitig zocken (meine Hardware gibt das locker her). Allerdings gibt es da ein Problem; Eine Hyper-V Virtual Machine wird mittels GPU-Paravirtualization (kurz GPU-P), immer als VM erkannt, was alle Spiele mit Unreal Engine (explizit EasyCheat) ausknockt. VMs sind nicht gestattet.

Der Plan: Unraid installieren und dort drei VMs mit Windows 11 starten, die GPU an die drei VMs mittels GPU-P "splitten" und hoffen, dass die Unraid VM nicht als VM erkannt wird.

Hast du oder irgendjemand Erfahrungen damit?

Been stuck here for awhile. Does this look like a fail? Not familiar with macos or opencore, so I have no clue what each error means.

When I get a "Cleanup tuneup" on an AMD E1 with 2GB of RAM and an about-to-die 250GB 4800RPM hard drive.
