Plex isn't seeing my ARC GPU?

Driving me Nuts! Been waiting forever for ARC support without Beta unraid, So now with RC I was excited. But nope cant get it to work WTF!

Running Unraid 7 rc2

Installed Intel GPU Top

Installed GPU statistics

The card is now visible on dashboard "Intel GPU DG2 Arc a380"

Added the device in the plex config as found on other instructions, IE: config type= device, Value =/dev/dri/

Yet there is no "GPU" section in the Plex dashboard (there is Bandwidth, CPU, Ram)

I am going to open my plex server to family member so I will need transcoding. Why GPU should I buy?
