Unable to authenticate Amcrest camera via ONVIF?

I'm trying to setup Shinobi as my NVR instead of having an entire system dedicated to it. I can login to my Amcrest camera via the webUI and create a new user account, view the password, etc. It also works fine on the Amcrest app on my phone, but Shinobi will not authenticate when I scan for the camera.

ONVIF authentication is turned on in the settings. I tried turning it off then back on again and it did not work.

Has anyone experienced this and found a solution? Or am I just dumb and doing something wrong.

I think for my Amcrest cameras I just don't have it use onvif.

Since posting this I figured out that I use the RTSP url, but it still doesn't work. It connects the camera to the monitor but it just displays a black screen. I just completely got rid of my Shinobi container and I'm just gonna figure something else out.
