Frigate using webrtc in home assistant

Hello there.

I finally got the frigate up and running. I would like to use webrtc as a live stream in frigate. Have any of you managed to get it to work? I have attached a screen dumb of my frigate.yml

I've looked in the documentation on frigate, but I can't get it to make sense...

```
! frigate.yml X
! frigate.yml > {} go2rtc > {} streams
1  ui:
2    use_experimental: false
3    live_mode: mse
```

you need to setup webrtc <https://docs.frigate.video/configuration/live#webrtc-extra-configuration>

once that has been done the most straightforward way to enable webrtc in HA via frigate is to go to integrations -> frigate -> configure -> enable webrtc

I undertook an interesting project today, a great example of using Home Assistant to add smart monitoring to a "dumb" device.
