## immich on portainer asustor

**Problem Solved:** I had bad path to photos and pgdata.

Hello is there anyone who can help me with immich instalation? I made stack like in immich page is suggested. But then immich\_server stauts is showing "starting". And never change status to running. Log:

The issue is that the server container can't find the database. Check the environment variables and container names.

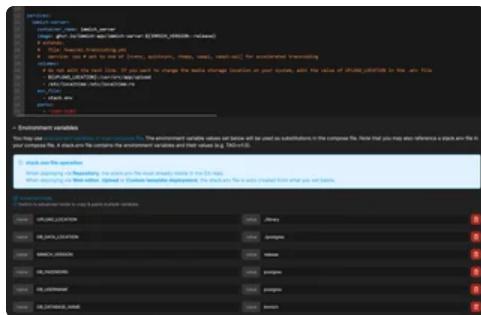

It would be helpful if you could post the docker-compose.yml.
