Leberkas3000

BTR17 dual output

I did get the btr17 to use both outputs at the same time (headphone and woojer strap). Is this possible? It looks like this is not provided. Is there any other fiio mobile device that can do this? Thanks in advance.

Even if this is possible, it is not recommended. These are portable, small devices that are not designed for this. I know the K9 series as a DAC/AMP with multiple outputs. I think desktop class portable DAC/Amplifiers like Q7 and Q15 can provide this in terms of portability.

I was thinking to use a splitter to have an additional input for the woojer strap. I will try that, hopefully the quality of sound will be the same

BTR17 supports dual outputs. Assuming it's like the btr15 I have there should be a setting in the menu to turn it on.

Edit: It's an option in the app not in the device menu. Replied below also

It's not. It only plays through 3.5 in that case.

Yes seems right. The splitter does the job good enough and i got my setup working! Thx
