Plex offline downloads now work?!

[Discussion](#)

The craziest thing just happened. Downloading shows and movies for offline play WORKED! When did they fix this feature?

Going on a road trip and decided to give offline downloading a try and it worked. I just can't believe it. This feature has been broken for so long I more or less gave up on Plex ever fixing it.

Just thought I'd make a post to see if it's just me or if it works for everyone else too.

I have always wondered about people that say that offline downloads don't work ... as I have had no issues per-say. The only constraint for me on iOS has been that I needed to leave Plex open while it was downloading; which is an inconvenience, but after that no issues watching fully offline inside Plex,

For me that was on a plane, so fully offline.

the download resumes. The best part is the downloads take minutes, not hours.

I have had issues. When I attempt to do an offline download, the circle gets stuck at 50% and never completes.

Another issue is if my phone screen sleeps, it corrupts the download *if* it even finishes.

From my experience its usually a mdns issue that prevents it from working.

Same, works well for me everytime. I've even downloaded a lot to my iphone and casted it to my ipad through hotspot and plex app. Havent done that in a while but saved my 16gb iPad for sure.

I now tend to just upload content directly to my phone and watch it through VLC. It's not remotely as easy or slick as using Plex - but has the major advantage that, when I get onto a plane and turn on flight mode, I know that the content will actually play.

I know some people, sometimes here, wonder why folk complain about downloads. If had problems for years, since the major change. I try and use it maybe once, or twice, a year, and when I do it just fails. It's not my rig, it's a transcoding power-house, but fails to download to both Windows and Android.

So... If someone posts that they had issues and now it's working, I just feel positive that maybe Plex are finally making in rounds to fix this.

I know for a fact that the official Change Logs don't always explain 100% the changes. So it doesn't surprise when something, not listed, is improved.

So, to the OP, I don't suppose you've made any other changes other than updating PMS? When did you last try to use it? 🙏😊

Before today it's probably been a year since I last tried to download something for offline play on Plex
