How to set indexer priority?

solved

For the life of me I can't see the option to configure indexer priority as per the wiki. All of my indexers have the default priority of 25, but are missing the option to change this value when I added them or edit them. Is there some kind of advance view I need to enable?

(Advanced Option) Select the indexer priority here from 1-50 (1 being highest). These priorities will sync to your apps.
