Trypsach

Check GOW Ragnarok version?

HELP/QUESTION

Does anyone know how to see what patch I'm on? I'm trying to update GOW Ragnarok and I'm not sure what version I have. I can't remember if I installed the first two updates or not 😅 I could have sworn I did, but when I right click the EXE>properties>details it says I'm on 1.0613.420. Does that mean I didn't successfully install the 1.1 and 1.2 patches? I know not doing them in order can corrupt some stuff so I'm trying to be careful here.

I backed up the files, but it takes 30min to copy everything so if I can do it without having to remake the folder a bunch of times I would be very grateful!

Im also still on 1.0613.420, even after installing 1.1.1 and 1.2 updates. Not sure if it was supposed to be that way.

Ok, I'll just dive in with 1.3 and the hot fix then. Appreciate the reply!

Está en la página de FitGirl Repacks de Ragnarok junto con las otras actualizaciones. El de ElAmigos de 1.6 a 1.7. No estoy seguro si puedo compartir el enlace aquí. Pero es el mismo lugar de donde descargaste el repack, solo baja un poco. Estoy usando un traductor para este comentario, así que espero que se entienda.

I downloaded God of War from fitgirl. After a while, it started lagging horribly. Few people mentioned the same issue in the comments there but none of the solutions there are working for me.
