The opkg update command failed with code 6 - I am stuck

I have been running OpenWRT for years and more or less the same setup, very standard and the only stand out is that I am running a Wireguard client on the router itself. Been zero issues. However, I tried to update the software the otherday and got error "The *opkg update* command failed with code 6." Went in via SSH and similar issue when running opkg update:

```
root@OpenWrt:~# opkg update
```

```
Downloading
```

```
https://downloads.openwrt.org/releases/23.05.0/targets/mvebu/cortexa9/packages/Packages.gz
```

```
*** Failed to download the package list from
```

```
https://downloads.openwrt.org/releases/23.05.0/targets/mvebu/cortexa9/packages/Packages.gz
```

```
Downloading https://downloads.openwrt.org/releases/23.05.0/packages/arm\_cortex-a9\_vfpv3-
```

The last 24.10 release candidate to be tagged on Wednesday, and 24.10.0 final about a week later. If you've found bugs they don't know about, now's the time to report them.
