Unauthenticated Paths Regex for Proxy Provider

Has anyone experience with unauthenticated paths in a Proxy Provider?

I'm trying do match an URI with a question mark, but it seems like there's a bug as mentioned in a github issue from 2023 <https://github.com/goauthentik/authentik/issues/5504>

What I want to add as unauthenticated path: app.mydomain.com/u3DGdc?dl=cpp

The regex which I tried were:

```
^/.*\?dl=.*$  
^/.*\?\\?dl=.*$
```

But it just doesn't work, any ideas on how to match this?

the regex

```
AUTHENTIK_LOG_LEVEL: trace
```

Authentik log:

```
trace | event=nginx forwarded url logger=authentik.outpost.proxyv2.application name=Was
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
trace | event=Matching URL against allow list logger=authentik.outpost.proxyv2.applicat
INF | event=/outpost.goauthentik.io/auth/nginx host=bin.mydomain.com logger=authentik.o
```

so basically all I have to match is "/FWqR-b" which is in the URL part, such regex looks like this:

```
^/[\w-]{6,7}$
```
