I've been using [this one](#) for over a year now and I really like it. It makes ice in a few minutes and is also pretty quiet too.

I recommend the [GE Opal 2.0](#) if you want one of the best countertop ice makers – it makes soft nugget ice and looks really nice. For a budget-friendly option, the [Igloo ICEB26](#) is a great pick. It's easy to use, affordable, and makes ice fast.

What would be a good way to do this? I try a zip lock and it always freezes into a clump

An audio device or gadget I wear on a lanyard around my neck. I press a button to record a brief message. I press it again to replay the message. Used as a memory aid.
