My minimap and overlay map are incredibly zoomed in. How can I zoom back out? I can't tell if it's a bug or if I am missing something

[Question](#)[Hideout with overlay](#)[Hideout with minimap](#)[Short vid in map](#)

I've restarted the game and my PC. I checked all the keybinds and tried holding down various keys while zooming with page up and page down and the scroll wheel on my mouse. I've tried changing resolutions, going between windowed and fullscreen... nothing is changing it. This is making it quite frustrating to navigate while mapping. Anyone have any ideas?

Being able to immediately see rares on map skyrocketed my mapping enjoyment / removed most of the frustrations.

All my symbols are blurry and some I can't even read. I've got all quality settings set between high and max. How do I fix this?

Did I miss something? I just started the game and it's pitch black

Cyberpunk UI blurs when I move my mouse, is this a feature or a bug? I've changed every setting I can think of and can't seem to find a solution.

When I go to my Rewards page, all I see is gently blinking boxes (see attached screenrecording), and no text. Why am I seeing this? Is it just me?

So I got a nice green Dell Inspiron 3800 laptop circa 2000, but it's giving off this screen before I can even use it! What should I do? (crossposted in r/Techsupport, more in comments)
