Pathfinder: Wrath of the Righteous

Each of the mythic paths has unique summons. The lich line in particular is cracked.

The Druid and Shaman classes have access to many different types of natural summons.

Witches and wizards have many elemental summons.

Oracles and Clerics have access to many divine summons.

....

FFX. One of the main characters is a summoner specifically.

Nioh 2 is built around evoking the powers of defeated enemies. Calling up enemies to use their abilities for yourself is distinct from the game's magic systems.

DMC5 has the character V, who fights by summoning familiars.

In Harebrained Schemes' Shadowrun RPGs, the Shaman class is a specific summoner archetype.

Lots of Diablo-esque action RPGs have summoner classes. Diablo 2's necromancer class is a lot of fun.

If you have access to a PS2 there were a pair of games on it, Summoner and Summoner 2.

EverQuest : necromancer, magician, Beastlord (shadow knight and shaman to a much lesser extent)

Last Epoch: I'm pretty sure each of the main starter classes has or will have a pet class option in it.

BG3 and DOS2 both have necromancy and summons. Although DOS2 makes it more of a primary class - BG3 seems to make it more secondary to a build (unless necromancy wizard is something crazy)
