download help please?

this is a shot in the dark but i gotta take it lol.

so i've been trying to download perfect world. it downloads fine on arc, but once i boot up the launcher it's on the northern realms version for some reason. on the auto update setting, it updates forever and makes no progress, or the blue bar makes it about 20% of the way before stopping. i turned off the auto update setting, but when i try to launch the game, it just directs back to arc and then the pwi launcher eventually closes. i've tried reinstalling, verifying files, everything. i'm losing my mind here and just wanna play the game. if anyone could help, i would really appreciate it

Hey!! The solution from the other user worked for me, so i'll paste it here!! Just trust the process because it'll take a hot second.

"I had the same problem, but it eventually worked when i didn't keep on tabbing in and out of the launcher. I just let it download and didn't touch the computer -or if i did i stayed tabbed out of the launcher-

Also it did take ages"

Hey! I meant to reply to the other person here, but I totally forgot! I did figure this out. :) It's what the user Past-Affect4443 said to do. It worked for me, and I'll paste it here! It'll take a long time, but trust the process and don't mess with it!
