FiiO UTWS5 2025

Why is nobody talking or reviewing the UTWS5 2025, there are so many threads about it when it was not released.

The ear buds battery is the same (60mah)

Firmware is different (0.58 vs 1.74) and shows up as "utws5 2025" on the fii app

I was really hoping the Idac on high quality (990 kbps) cutting out was fixed on my pixel phone (8 pro) but still cuts out after a while unless I bump it down to (660kbps)

But I guess it's to be expected since the chip hasn't changed + pixel phone.

Aptx works perfectly though.

I got the mmc version so I can just use the 2 pin converter and have some swivel on the fit and it's working great.

Edit: I came across this post on the Odb forum (Korean) with Chinese source?

<https://www.Odb.co.kr/FREE/4700546>

It looks like fii currently has no plans for an upgraded version of utws5 (like utws7 or utws5 pro), but can't really say for certain since this is just a forum post.

Thanks for the info! Using mmc to 2 pin adapter sounds like a great idea. I assume the mmc version doesn't come with a 2 pin adapter, so I'd have to get my own, right?

Mine arrive today, that was a good idea getting the MMCX for rotation, I wish I thought of that. Hopefully they're at an angle I like already.

Regarding their plans for other models they spoke about it on their Facebook in a post about the UTWS5.

"Simply put, for Hi-Fi TWS products, there is not much room for significant improvement in audio performance at the moment. Therefore, the audio performance of the UTWS5 2025 remains the same as the previous version, and FiiO will not release higher-end models such as UTWS5 PRO or UTWS7 in the short term."

Just got it today. Not much changed from the previous version from build perspective. What I noticed is that the sound is louder than the previous version.

  3   Reply ...**Arupendra1** OP • 8mo ago

Well, the biggest change is wireless charging you don't have to live in fear knowing someday the pin will rust and stop charging and also about what you said that means the amp is improved

 3   Reply ... 3 more replies**residentatzero** • 8mo ago

Do any of these adapters sound as good as a Qudelix 5K or BTR15?

  2   Reply ...**TheCircuitBox** • 8mo ago

That is what I want to know. Q5K has been excellent, but I need wireless sometimes.

 2   Reply ... 2 more replies**Baekmagoji** • 8mo ago

What's there to talk about? It has the exact same audio components as the previous revision.

  -1   Reply ...**Kukikokikokuko** • 8mo ago

Is it? I thought it was somehow upgraded. Bummer. Anyway the guy is right, these were known to be the best (decently priced) Bluetooth adapters until they got discontinued, so it is kind of a big deal they're available again.
