Self-hosted personal planner/scheduler for day to day use

Hello

I'm looking for a **Self-hosted** user-friendly personal planner/scheduler that can be used to plan every day/ every week/ every month/ every year resolutions and keep track of also with the ability to assign every day or one/few days a week or specific time of that day to a specific task. for example: one of the resolutions of march is to read book "Think and grow rich by napoleon hill" and I assign every Sunday and Wednesday of march from 13:45 to 16:00 to reading this book and each time after I read the book for that period of time I put a check-mark so it will calculate and show to me that since now I read/done it 21%. (The book thing was just an example it can be used for anything (keep track of learning and studying a new language or simply cleaning your room every other day)).

Off course such thing might not exist now but this post may give the idea and motivate someone to build one later :)

This is a very specific need. I am not aware of a selfhosted app doing that but this remind me of [Loop android app](#) on Fdroid

zigzatuzoo • 2y ago

Yo, I know its a bit longer then 7 days but it looks like the RemindMeBot didn't actually register this message. So here's your reminder about this 2 years later lol.

On the topic though, I would highly suggest <https://vikunja.io/>. Seems like the other ones suggested here haven't been updated in a while and this one is legit a few docker containers and your up in like 5 minutes

its this to host the api

```
docker run -p 3456:3456 vikunja/api
```

or this if you want to set a path to edit the config on the host

```
docker run -p 3456:3456 -v /path/to/config/on/host.yml:/app/vikunja/config.yml:ro vikunja/api
```

and this to run the frontend

```
docker run -p 80:80 vikunja/frontend
```

Nextcloud could work for this, but may not be the best fit. Only thing that comes to mind... Hopefully others have suggestions!

It sounds like maybe a Kanban Board is what you're after?

<https://github.com/plankanban/planka> is a self-hosted Kanban Board.
