Thanks :) Looks really good. Grabbed some items from my stash to test out.

to get around to it. Lol.

I did add "Skill Gem" and "Support Gem" even though they don't drop directly. I also made gold look a bit different than yours. With yellow circle,

How do i get this item filter to work?

1 Reply ...

Danru07 • 7mo ago

Is it possible to hide certain kinds of gear drops? Like idc about shield and stuff unless its rare. What would the code be then?

How do i change it to .filter? I open and go to save as but can only save as text file

 1   Reply ... 1 more reply**Honest-Minimum-3712** • 7mo ago

Doesn't work...

 1   Reply ...**Mediocre-Painting548** • 7mo ago

How do I change the type of a file to .filter ? Sorry I am new to these type of things and thank you in advance.

 1   Reply ...**Helpful_Bunch2517** • 7mo ago

when you go to save the text file threw save as function, you put the name Followed by .filter, Ex. (CustomFilter.Filter) you also need to make sure that before you save it that you set file type to all files. where it says Save as type you need to set that to all files. then when you hit save it will create it as a filter file other wise it will become a text file if you don't change this and it will make it CustomFilter.Filter.txt

 2   Reply ...**Sythus** • 7mo ago

is it possible to highlight class specific gear? like I got focus, but for body armor and whatnot, could i set it to evasion=X, armor=x energy shield= x?

 1   Reply ...**Fredoodler** • 7mo ago

This isn't working for me.
I made the .filter file but when I go ingame and try to select it in options Windows just asks me what program I'd like to use to open the file.
No luck.
