Apps/Software to develop a feminine voice?

Question

Hey there. I'm searching for good Apps (android) or Software (windows) to help me develop a natural sounding feminine voice. I have heard about this app called eva f but sadly It isn't around anymore. I'm already using voice tools but would like to know if there are any other apps/Software that could help. Maybe even giving me exercises and such

Try to not use applications for training, especially not applications like Voice Tools, that pretend that they can gender voices (they cannot.) The whole point of early stages in training is developing good ear for elements that mater (size, weight,) and decoupling them from pitch.

Also, be weary of the YT material out there - most of it is bad...

Before training, learn how to train.

Do you know what differentiates the good material from the bad? I've come across a lot of guides that just leave me confused more than anything.

Voice Tools on Google Play, it has a trans flag colored icon. Also any recorder app helps. Record yourself reading things, listen, then try again. and practice, practice, practice. There are numerous guides and lessons on YouTube.

There are many Discord groups dedicated to helping people get started! The best way to practice is with a voice coach, but if that's not affordable in your country, you can find supportive communities on these servers. Practicing with others and recording yourself is key to improvement.

If you need a link, feel free to DM me!
